

Connecting to Eduroam SSID Android

Follow the QR code to Google Play Store
for ClearPass QuickConnect App

Note: Instructions based on Android 11

For the best results, please enter your Default Apps settings and set the default browser to Chrome, if it is not already configured.

The install steps are also simpler if you download the Aruba QuickConnect app from the Google Play Store prior to connecting to FP-Guest, Scan this QR code to be taken to the app:

You can use this QR code to take you to the PlayStore directly for the app

Step 1: Connect to the FP-Guest SSID

- Please follow any prompts to sign in.
- If you were NOT prompted to sign in please open the Chrome browser and navigate to: https://login.franklinpierce.edu/guest/device_onboarding.php

Use the QR Code to follow link, if desired

Step 2: At the Guest registration portal (screen below) navigate to the button to access the Franklin Pierce Onboarding Portal

Step 3: At the Franklin Pierce Onboarding portal enter your username followed by @franklinpiercedu. Example: doec@franklinpiercedu

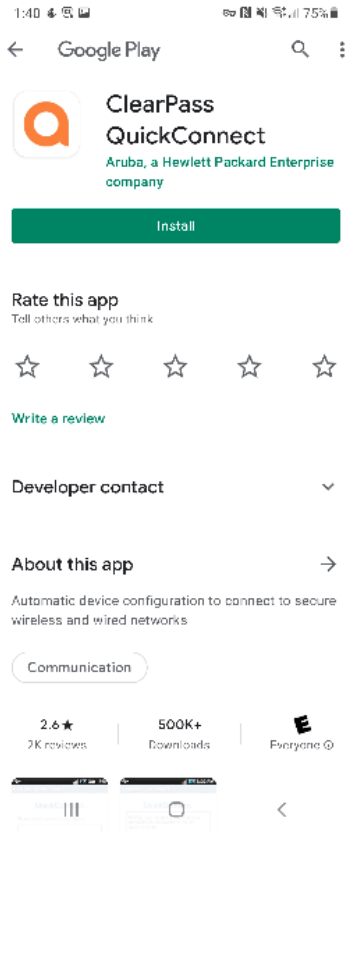

The image shows a login screen for Franklin Pierce Wi-Fi. At the top is the Aruba Networks logo. Below it, the title "Franklin Pierce Wi-Fi" is displayed. A message states: "In order to connect to this network, your device must be configured for enhanced security. This wizard will guide you through the configuration process." Below this is a login section with the text "Login below using your Franklin Pierce University credentials." There are two input fields: "Username" and "Password". A "Log In" button is positioned below the password field. At the bottom, there is contact information for the IT Help Desk and a copyright notice for 2021.

Step 4: Click the button to Install QuickConnect:
- If you previously installed the QuickConnect app click the link provided.

The image shows a screen for installing the QuickConnect app. It features the Aruba Networks logo and the title "Franklin Pierce Wi-Fi". A message explains that the device needs to be configured for enhanced security. Below this, it states: "To apply the network profile, you first need to download and install the QuickConnect application from Google Play." There is a prominent button labeled "Install QuickConnect" with a download icon. Below the button, it says "Download and install the QuickConnect network configuration applet on." At the bottom, there is a link that says "I have already installed QuickConnect." and a copyright notice for 2021.

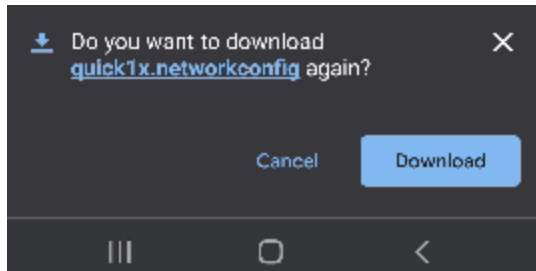

Step 5: You will be taken to the Google Play Store, to the ClearPass QuickConnect app, Click the Install button.

Step 6: After app installs, click the back button and Install Network Profile:

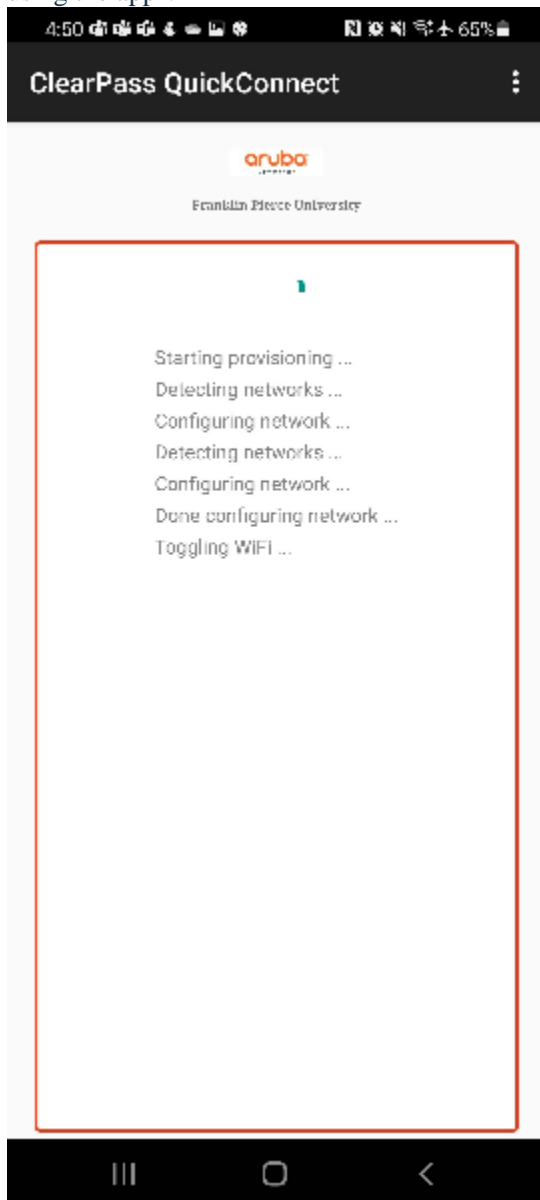

Step 7: You will be prompted to download the file:

Step 8: You should get an info page about QuickConnect. Click the Continue button and QuickConnect should begin configuring your device:

- You may receive prompts from your device regarding app permissions, we recommend choosing "While using the app".

Step 9. Once QuickConnect is finished, you should be returned to the portal with a message: Device provisioning complete.
